

16 March 2010

SELEX Communications exhibits at HOSDB, Farnborough, 16-18 March 2010

SELEX Communications, a Finmeccanica company, will be exhibiting a range of systems which support the Security & Resilience sector at the UK's Home Office Scientific Development Branch (HOSDB) exhibition, Farnborough, between 16 and 18 March. Our capability on display will include:

Trojan interface

The Trojan radio interface system is easily fitted to a wide range of civilian vehicles without technical support. It provides effective communications and is ideal to meet the challenges posed by rapid tempo operations.

IED suppression

We supply a wide range of radio frequency "Guardian" products designed to provide security forces with protection against the remotely-controlled Improvised Explosive Device (IED) threat.

Covert and ECM antennas

SELEX Communications is the UK market leader in providing solutions for specialist overt and covert configurations across a wide range of platforms

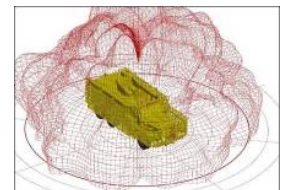

Satcoms-on-the-move

Our satcoms-on-the-move system provides reliable long-range connectivity in the absence of terrestrial infrastructure to meet the demands of defence and professional users

Antennas/ECM modelling

The company is the UK market leader in providing advanced analytical simulation tools
